**Insert:** "NEW SECTION. Section 18. Monitoring requirements.

(1) A monitoring plan that is included as part of a mitigation plan or an aquifer recharge plan, required under [section 17], for the purpose of evaluating and verifying the assumptions of a mitigation plan or aquifer recharge plan must:

(a) be implemented for at least 2 years after issuance of a permit;

(b) include proposed time intervals for sampling and subsequent reporting not to exceed once every 6 months;

(c) include data necessary to evaluate the effectiveness of the monitoring plan and the mitigation plan or aquifer recharge plan with regard to adverse affect to prior appropriators;

(d) include descriptions of measurement methodology, threshold values, and evaluation techniques; and

(e) include collection of data necessary to determine compliance with water quality standards and other water quality-related requirements established pursuant to [sections 20 and 21].

(2) All data and other related information collected through a monitoring program or monitoring plan must be submitted to the department and the bureau of mines and geology. The bureau of mines and geology shall ensure that information submitted pursuant to this section is entered into the ground water information center database as part of the ground water assessment program."
